

VANGUARD®

Your Single Advantage. Vanguard® Power.

The first single-cylinder, horizontal shaft commercial engines built from the ground up in nearly two decades don't compromise on what our customers care most about — overall performance, true power and maintenance.

Vanguard 160

Vanguard 200

Vanguard 400

Inspired by the Experts.

Vanguard set a new standard for single-cylinder engines by listening to the experts — leading equipment manufacturers, contractors, rental store employees and equipment operators. The result: easier-starting engines that run quieter and smoother and require less maintenance than competitors. And we back them all with better service and support solutions.

Optimized Starting

Starting sequence requires less effort and is tested to perform down to -20° F

- > **Advanced design of ignition, combustion and carburetion systems** deliver reliable, easy starting in all seasons
- > **All-new governing system and mechanical compression release** improve cold-weather starting
- > **Plated carburetor surfaces** help resist corrosion and build-up caused by stale fuel

Unrelenting Power

Exceptional power is what matters to our customers

- > **Power that's built to perform in the real world**, — not just at a testing facility
- > **Vanguard engines deliver demonstrably more rugged, reliable power than the rest** — no matter the conditions

Innovations

Cyclonic Air Filtration

- > **True cyclonic air chamber** actively manages the airflow
- > **Advanced Nano Filter Media with Autoshed Technology** provides up to 120% more dust-holding capacity
- > **600 hour** air filter replacement interval

TransportGuard®

- > **3-in-1 control lever** — for user-friendly operation
- > **Combined throttle, ignition and fuel control lever** — prevents mixing of fuel and oil during transport
- > **Saves you money** — reduced costly downtime and expense

Extended Maintenance Intervals

Reduces time in the shop and increases time on the job site

- > **Advanced oil management system** allows the engine to run efficiently for up to 200 hours between oil changes
- > **Oil sensor protects the engine** from low oil level conditions

Superior Support Solutions

A superior-performing engine is just the beginning

- > **The parts you need**, when you need them — wherever you may be in the world
- > **Industry-leading** global 3-year limited commercial warranty* processed in 48 hours or less
- > **Dedicated** commercial technical support available 24/7/365
- > **Genuine parts**, prices with your bottom line in mind
- > **Service education** that trains more than 6,000 certified technicians **worldwide annually**

Register your engine at vanguardpower.com/registration, and receive an extra year of commercial limited warranty!*
