

VANGUARD®

Your Single Advantage. Vanguard.

The first single-cylinder, horizontal shaft commercial engines built from the ground up in nearly two decades are powered by customer-driven engineering and innovation.

Vanguard® 160

Vanguard® 200

Vanguard® 400

BRIGGS & STRATTON, LLC

Inspired by the Experts.

Vanguard set a new standard for single-cylinder engines by listening to the experts — leading equipment manufacturers, contractors, rental store owners and equipment operators. The result: engines with exceptional power that start easier and require less maintenance than competitors. And we back them all with better service and support — including an industry-leading warranty.

Optimized Starting

Starting sequence requires less effort and is tested to perform down to -20° F

- > **Advanced design of ignition, combustion and carburetion systems** deliver reliable, easy starting in all seasons
- > **All-new governing system and mechanical compression release** improve cold-weather starting
- > **Plated carburetor surfaces** help resist corrosion and buildup caused by stale fuel

Unrelenting Power

Exceptional power is what matters to our customers

- > **Power that's built to perform in the real world**, — not just at a testing facility
- > **Vanguard engines deliver demonstrably more rugged, reliable power than the rest** — no matter the conditions

Extended Maintenance Intervals

Reduces time in the shop and increases time on the jobsite

- > **Advanced oil management system** allows the engine to run efficiently for up to 200 hours between oil changes
- > **Oil sensor protects the engine** from low oil level conditions

Cyclonic Air Filtration

Extends air filter replacement interval to 600 hours

- > **True cyclonic air chamber** actively manages the airflow
- > **Advanced Nano Filter Media with Autoshed Technology** provides up to 120% more dust-holding capacity¹

TransportGuard[®]

Eliminates oil/fuel dilution

- > **3-in-1 control lever** – for user-friendly operation
- > **Combined throttle, ignition and fuel control lever** – prevents mixing of fuel and oil during transport
- > **Saves you money** – reduced costly downtime and expense

Superior Support Solutions

A superior-performing engine is just the beginning

- > **The parts you need**, when you need them — wherever you may be in the world
- > **Industry-leading** global 3-year limited commercial warranty² processed in 48 hours or less
- > **Dedicated** commercial technical support available 24/7/365
- > **Genuine parts**, prices with your bottom line in mind
- > **Power Code found on each engine** that gives you immediate access to the owner's manual, troubleshooting information, and the ability to locate the nearest dealer with the scan of your smartphone
- > **Service education** that trains more than 6,000 certified technicians worldwide annually

Register your engine at vanguardpower.com/registration, and receive an extra year of commercial limited warranty!³
