

DIFFERENTIATE FROM COMPETITORS WITH PROPANE CONVERSION KITS.

A Greener and Efficient Alternative Energy Source.

We've made it simple to convert gasoline-powered commercial equipment to propane fuel by developing EPA- and CARB-certified conversion kits for select Vanguard® engines. With propane, you can expect lower fuel costs and less engine maintenance. The higher octane level in propane improves performance and fuel economy over non-optimized engines, and tanks are easy to switch, minimizing equipment downtime associated with refueling. Propane is less carbon-dense, significantly reducing harmful emissions. Stand out from the competition by offering your customers a greener alternative fuel option.

LOW-RISK

- Low pressure (~200 psi)
- Narrow flammability range
- Fuel tanks are 20 times more puncture resistant than gasoline tanks

OEM BENEFITS

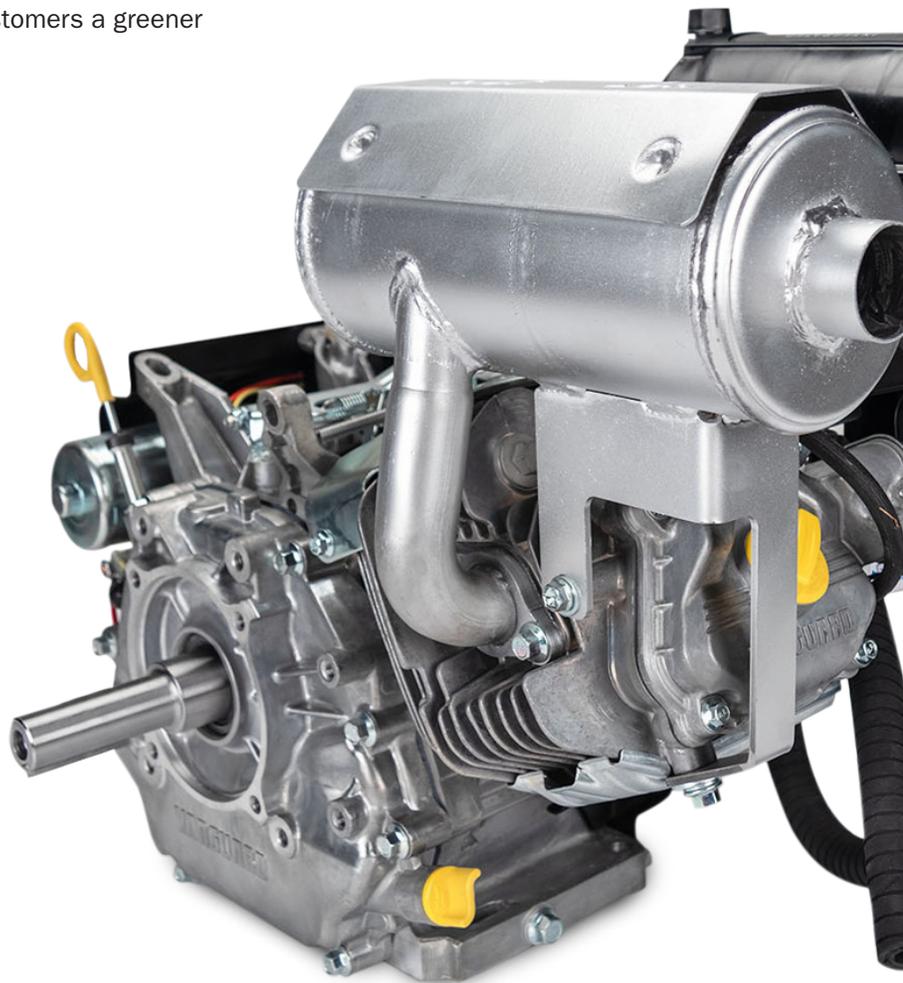

- Expand product offerings to provide customers an alternative to gasoline
- Provide equipment solutions that help customers meet emissions requirements
- EPA and/or CARB certified engines
- Create a competitive edge
- 3-year limited commercial warranty* Vanguard/PPS

DEALER BENEFITS

- Be a complete resource for commercial customers
- Stand apart from the crowd
- Sales and service training

END-USER BENEFITS

- No fuel issues from storage
- No fuel spillage or "shrinkage" from employees
- Market business as "green"
- Vapor delivery with 108 octane, great performance
- 70 – 80% less carbon in the fuel resulting in cleaner oil & spark plugs

* See vanguardpower.com for warranty details.

VANGUARD CERTIFIED CONVERSION KITS

THE VANGUARD 400 SINGLE-CYLINDER ENGINE IS THE FIRST
IN ITS SIZE CLASS TO BE **EPA CERTIFIED**.

ENGINE	CC	CONFIGURATION	EXHAUST	CERTIFICATION†
Vanguard 200	203cc	Horizontal	Catalyst	EPA
Vanguard 200	203cc	Horizontal	Catalyst	CARB
Vanguard 300	307cc	Horizontal	Catalyst	EPA
Vanguard 400	408cc	Horizontal	Catalyst	EPA
